This one should be a straight forward of.
It is done by the mob against a team of
irritating police+men.

Vircingetoris (AKA) and 3 other gangsta's create
an incident in an alleyway.

There they come!

There is a staircase, garbage cans of a small
sort, slimy dirty walls, a rat skitters off scared by
the action, bugs crawl everywhere. Besides that it is
a regular corridor-like alleyway. The team of
police+men are attracted by the crashing of a
garbagecan near the entrance knocked over by a small
african boy.

The +cops come into the alleyway after first
covering the entrance & checking for an ambush.

Vircingetoris calls out, 'It's O.k., it's us, let us approach each other slowly weapons obvious, and talk.'

They call out to each other and it comes back that this an agreeable situation. We are aware of their incoming laser sniperriflemen who are not quite yet in position.

They call out in standard code, 'We will approach with each other two meters ever agreeable exchange.

They approach two meters, 'You know of that?'

They are now 4 meters away from each other, Vircingetoris with his three buddies and there are 6 of them in position, approaching are the laser sniperriflemen in 30 seconds.

Vircingetoris says, 'Kick their asses, WILLO-DILLO.'

They approach 2 more meters. They all face each other, standing, weapons obvious.|||||||

'We agr...'

Unbeknownst to those around him, A concealed electric sword zips into shape on the back of Vircingetoris, clasping into form.

2 meters is all he needs to.

Whip out a blazing electrifying arc, instantly killing the first police⁺man on the right.

He sidesteps forward cutting down into the second on the right.

Shooting starts.

By this time he is spinning towards the wall mincemeating the third on the right. His back slams against the wall.

He shoots an arc of pure laserlight, storting with his own men who are taking laserfire.

Vircingetoris's weapon is extra specially concentratedlaserfire which was undetectable by scans because its intensity is based on a complex modulating algorithmis frequency.

He cuts a bright shining arc from left-to-right slicing each and every one of hi's own three buddies and the remaining three police+men.

His body hits the ground between the garbage cans for this was all done in one motion.

He succeeded.

At the 20 second mark he runs off into the night!
